Summer 2024

Outdoor furniture has taken over terraces, balconies and poolsides. It conveys a new way of enjoying open-air spaces, in search of conviviality, relaxation performance, ensuring strength and durability; modularity allows compositions to be created that are ready to respond to new open-air scenarios, while functionality, creating outdoor settings that are in harmony with nature and the landscape

Outdoor dimension

and wellbeing but with plenty of style and at the same time, practicality. Materials therefore offer even higher levels of design is sophisticated, sensory and welcoming, inspired by that inside the home. Innovative aesthetics go hand in hand with

BREZZA . ALESSANDRO STABILE

The Brezza range has been extended. The chair designed by Alessandro Stabile for S-CAB has given rise to an entire collection that includes a lounge chair and two-seater sofa that take up the design of the original model. The recurring feature is the distinctive cushions that embrace and fix the frame - without the need for adhesives, buttons, zips or velcro, all in the name of sustainability. Attention to sustainability also emerges in the choice of fabrics made from recycled fibres, including two new versions that are made from post-consumer recycled materials combined with pre-consumer industrial waste material. The cosy and informal appearance, versatile and environmentally-friendly approach make Brezza a proposal for enjoying outdoor living with a sense of conviviality and lightness. A functional touch has been added with a low table (with slats in cement or HPL) to complete the offer.

CARRERA

The distinctive feature of Carrera, the new bioclimatic pergola from Pratic, lies in the innovative system of shading made up of alternating fixed and mobile blades that follow the natural orientation of the sun. Thanks to a dynamic design, the mobile blades lift and slide to the point of disappearing above the fixed ones in perfect alignment. What is more, depending on the angle of the sun or the amount of light desired, the blades can be moved from right to left and vice-versa, exceeding the perimeter of the fixed blade to stop in any intermediary position. This technology, combined with Pratic weather sensors, means that Carrera's movement can be regulated to follow that of the sun, from dawn through to dusk. In addition, the fixed blades enable the installation inside the pergola of hanging elements such as lamps or systems of heating, as well as the Mod-Lines modular system in aluminium, a new accessory that has been designed - along with the decorative Drapes - to furnish Carrera.

ALCOVA . ATMOSPHERA CREATIVE LAB

Inspired directly by the Arab tradition of the "al-qubba" or alcove, the intimate and secluded space in the bedroom given over to the bed, adorned with exquisite oriental silks and gold paintings. A place of rest, of value, and passion. Atmosfera recreates the idea of this feeling in the Alcova collection, poised between furniture and architecture for exteriors. An aluminium structure supports a system of sliding panels in teak and aluminium that offer protection from the sun and wind, allowing light to delicately filter through. Inside can be accommodated Lounge, Daybed and Dining options, openly connected with nature but at the same time able to protect privacy and wellbeing. Thanks to the light blinds and ergonomic cushions the result is a welcoming place where you can completely relax out in the open air.
