S-CAB Brezza

Designed by Alessandro Stabile, the Brezza armchair offers an innovative take on outdoor comfort, wherein the frame and cushions engage in a surprising dialogue. The generous upholstery leaves the round metal legs exposed, lending strength and visual identity to the armchair. Exuding sturdiness and resistance, Brezza is also practical; the upholstered elements are easy to fit into the frame, while a simple gesture is required to remove, wash or replace the upholstery. "I chose fabrics made from recycled yarn and then designed a non-glue construction of the various elements," explains Stabile. "The frames can be stacked to reduce the shipping footprint and consequently CO₂ emissions."

RAK Ceramics RAK-Ingot Washbasins

Sanitaryware and surface brand RAK Ceramics has launched its newest innovation, RAK-Ingot Washbasins. Designed to captivate with its sleek shapes, the washbasins are available in four distinct profiles – oval (550x350x115mm), rectangle (500x350x100mm), circle (360x360x110mm) and square (400x400x10mm) – ensuring compatibility with a variety of bathroom layouts. The hallmark of the collection is its array of finishes – Matt Black, Brushed Nickel and Brushed Brass – which have been crafted to complement the current trend for metallics and unique textures in contemporary bathroom design. The RAK-Ingot Washbasins are engineered for seamless integration with the brand's accessories, mirrors and taps, ensuring a cohesive aesthetic.

Geberit AquaClean Alba

AquaClean Alba is a new shower-toilet combining Geberit's sophisticated product design with streamlined features for ultimate hygiene. Patented WhirlSpray technology delivers a gently effective cleansing experience, while the quiet TurboFlush 2.0 system and an ergonomic, rimless ceramic design ensures optimum hygiene and cleaning of the pan. AquaClean Alba offers heated water, an automatic descaling programme and a remote-control with wall bracket and Geberit Home app integration, allowing users to adjust the shower temperature and spray arm position from their smartphone. Compatible with all Geberit installation systems, the toilet features monolith modules and AquaClean design panels to enable seamless integration. A removable cover provides easy access to the descaling agent fill and spray nozzle, while the control's LED indicator and app alerts when descaling is necessary.
